

BMX055

Shuttle Board

Bosch Sensortec

BOSCH
Invented for life

Description

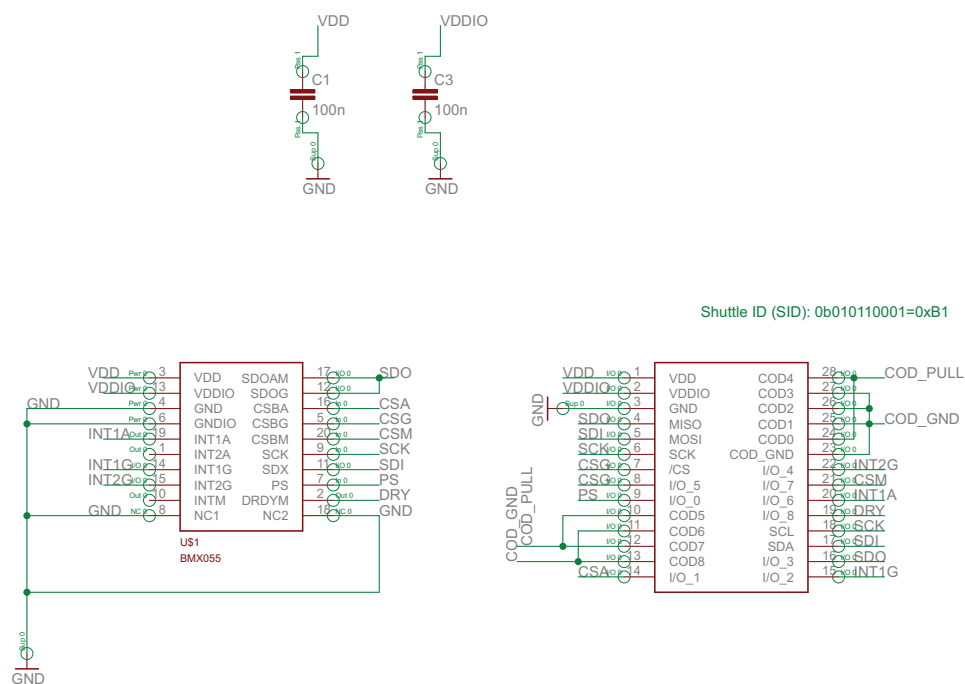

The Bosch Sensortec BMX055 shuttle board is a PCB with a BMX055 Inertial Measurement Unit (IMU) mounted on it.

It allows easy access to the sensors pins via a simple socket. As all Bosch Sensortec sensor shuttle boards have identical footprint, they can be plugged into Bosch Sensortec's advanced development tools (e.g. the Development Board or Application Board). Of course, the BMX055 shuttle board can also be used for customer's own implementations.

Note: Product photo may differ from real product's appearance
